

Accessibility

Nugent recognises the need for the website to be accessible to all. We have implemented a number of features to make this website easy to use, especially for users with disabilities.

We will continue to make improvements in an attempt to make this website as accessible as reasonably possible.

Style sheets

This site uses Cascading Style Sheets (CSS) for visual layout. If your browser supports it, style sheets can be disabled or over-written to customise the appearance of the website, to your preference.

Font sizes

Using the majority of modern browsers you can change the size of the font using your keyboard and mouse. Press and hold Ctrl, then move the mouse wheel up or down. Alternatively, press and hold Ctrl (or Command on Mac), then press + or - (plus or minus) to increase and decrease the font size.

Forms

Labels are used to assist access to form fields. All forms follow a logical tab sequence.

Tables

Tables are used to display tabular data. Tables are not used for general site layout. This means our tables are being used in a correct and meaningful manner.

Colours

The site has been designed to be easy to read through its colour combinations.

Links

We have worked hard to ensure that our links are meaningful, and some links are explained in greater detail by using a title attribute.

Scripting

JavaScript is used on the site to improve usability. All pages and processes are still accessible and usable if JavaScript is disabled or unavailable.

We are striving to meet our obligations under the Disability Discrimination Act (DDA) 1995 with respect to the provision of services online. <http://www.drc-gb.org/>
